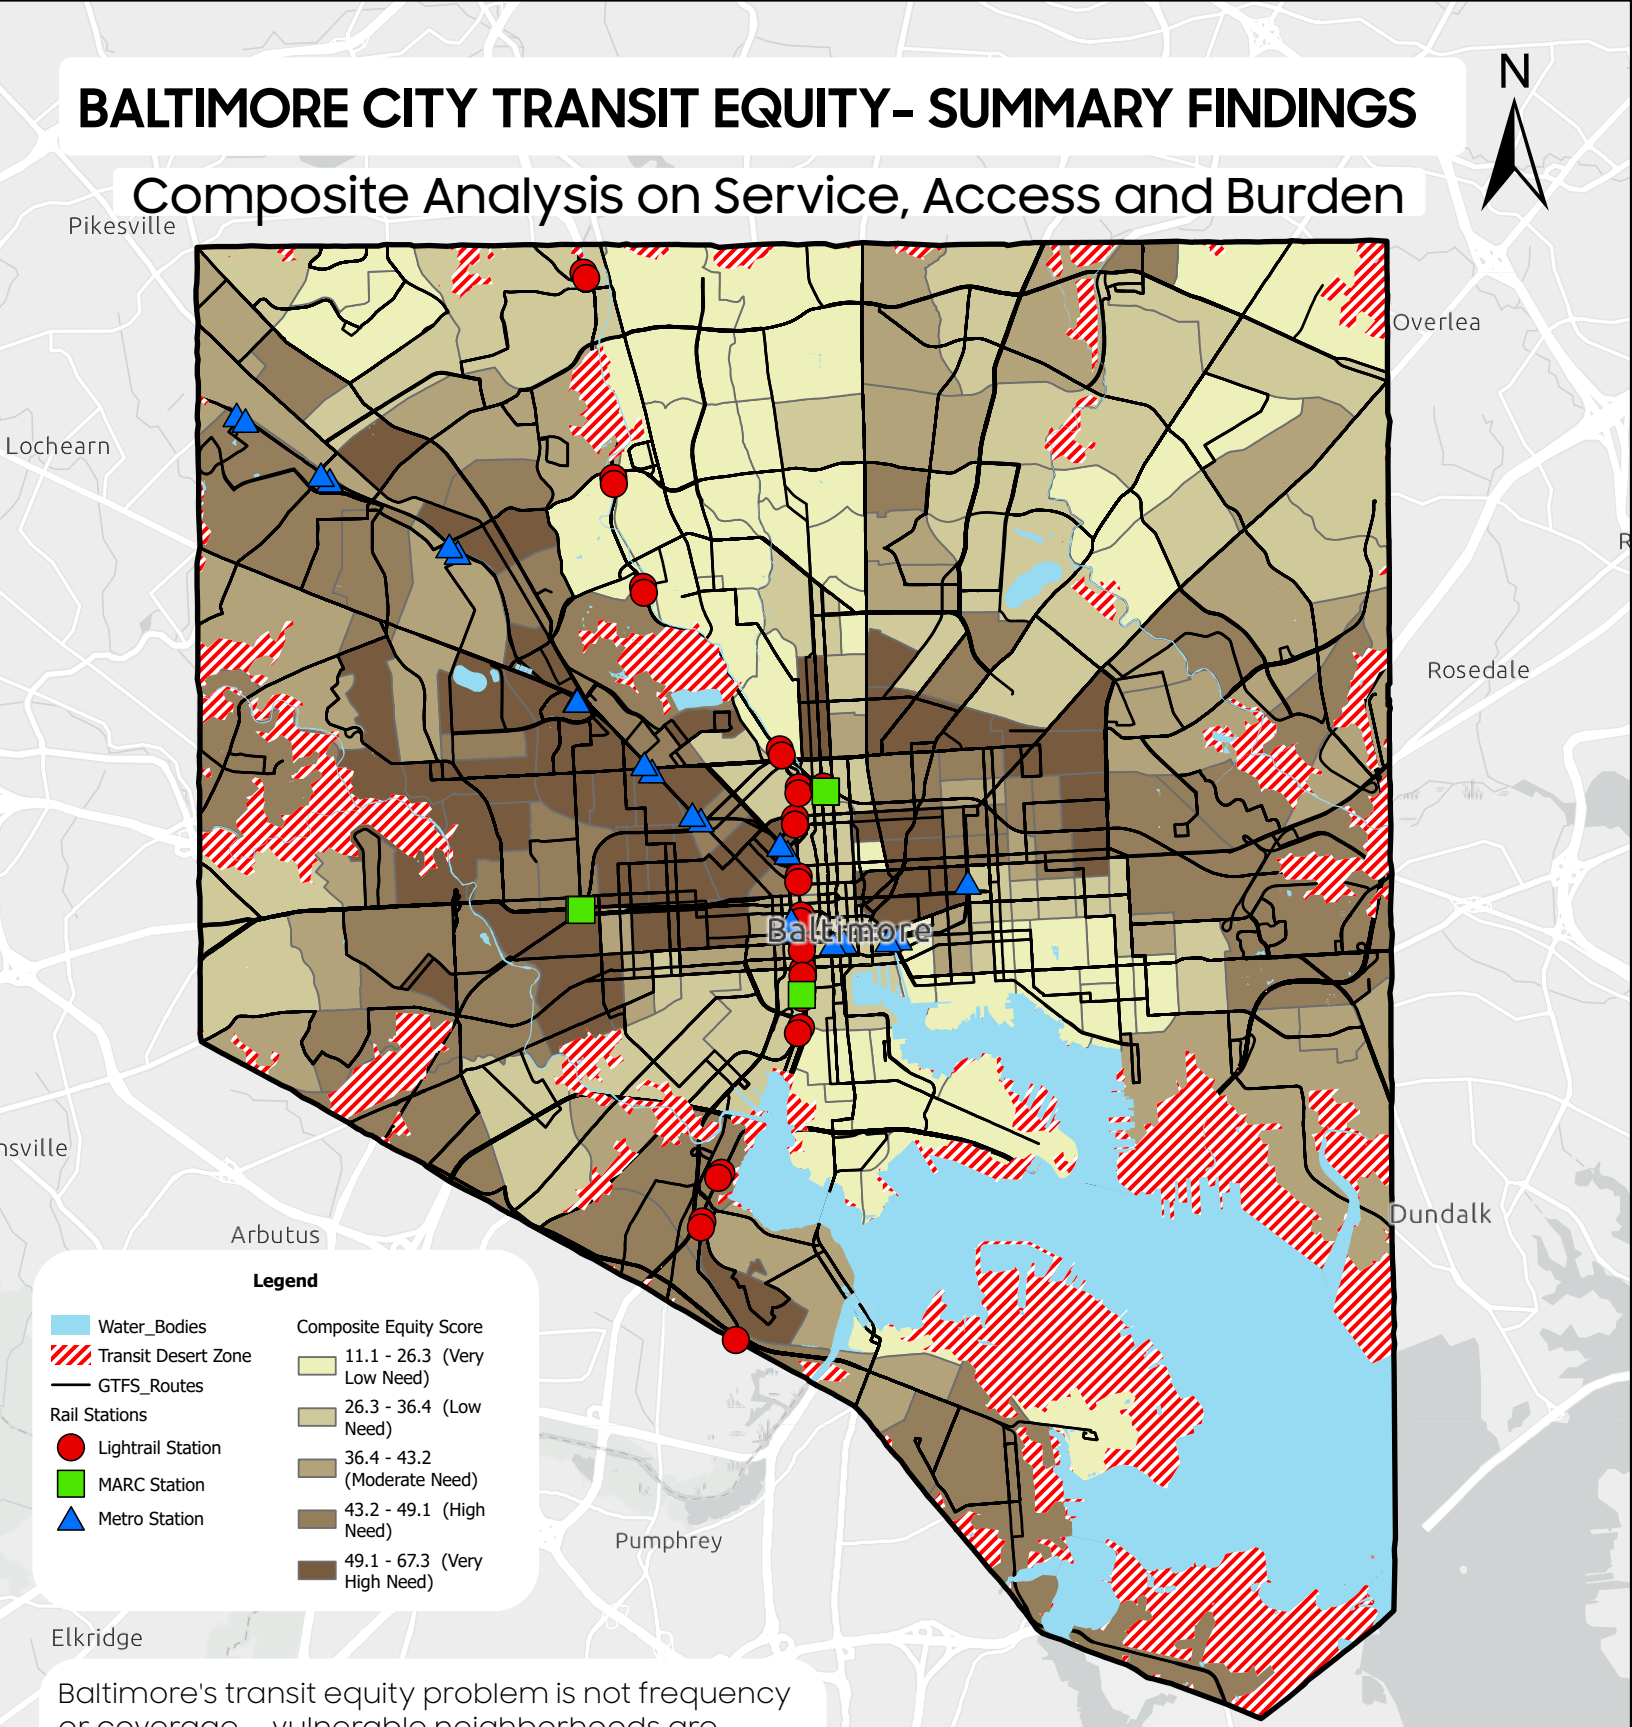
BALTIMORE CITY TRANSIT EQUITY- SUMMARY FINDINGS

Composite Analysis on Service, Access and Burden



Baltimore's transit equity problem is not frequency or coverage – vulnerable neighborhoods are served more frequently. The real burden is commute time: low income residents commute 57% longer (30.9 vs 19.7 min). Two Title VI findings: Hispanic spatial gap (1.54x) and minority commute burden (1.36x). Baltimore remains 95.8% bus dependent with rail in only 10.5% of tracts.
